

## *Sustainable Thinking*

*Our consumption and our  
interactions shape the world!*

With your booking, you are entering a special location that has set itself the goal of making the environment a better place than we found it.

Together we want to create a respectful coexistence and design a sustainable space for events.

Fresh from our garden

## *You are what you eat*

Our homemade OSD lemonade

### FOOD AND BEVERAGE

When selecting our products, we pay attention to ecological, social and ethical responsibility. That's why we work with sustainable partners such as Chef's Culinar, source wines from organic vineyards and make our own lemonades with seasonal fruit.

Fresh herbs grow in the OSD garden and new suppliers are checked for their commitment to sustainability.

## *How we interact*

### SOCIAL RESPONSIBILITY

At OSD, we offer flexible working hours and the opportunity to work from home whenever possible.

People from different cultures and with different life stories work together in our international team.

An inclusive, respectful working environment is an essential part of our philosophy.

Our employees also have the opportunity to undertake further training during working hours and take on new challenges.

## *What surrounds you*

### PRESERVATION OF THE HISTORICAL VALUE

OSD is a place with history. Around 1830, the horses of the Berlin carriage king were shod in the listed smithy, and later the squatter scene found refuge here. We feel obliged to preserve this cultural heritage. Our historic buildings and furnishings are the result of an unceasing passion to discover old things and give them a new life in our location.

The design concept is based on our "3 Elements" interior design project, which focuses on sustainability.

## *Where it comes from*

### ENERGY

We are currently evaluating the feasibility of installing solar panels. At present, we source 100% green electricity.

### WATER TREATMENT

Our in-house LEOGANT water treatment plant filters groundwater into high-quality drinking water and enriches it with energy. We minimize waste by avoiding, separating and recycling. Our location and offices are designed according to ecological principles. We follow the principle of a paperless office and have converted all processes to digital where possible.

## *Responsibility for the environment*

### PRESERVATION OF THE HISTORICAL VALUE

We minimize waste by avoiding, separating and recycling. Our location and offices are designed according to ecological principles. We follow the principle of a paperless office and have converted all processes to digital where possible.

## *What we promote and support*

### CULTURAL PROMOTION

Our association O.S.D e.V. promotes young, talented female artists in the field of analog and electronic music with a focus on sound.

We also organize sophisticated electronic sound performances with our audiophile concert series AUDĪR.

We offer high-quality equipment and professional management to give female artists better opportunities in a highly competitive market.

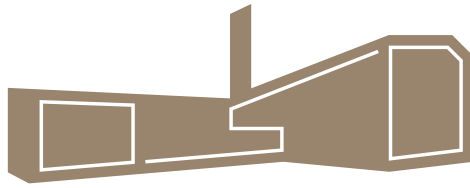

## *Verantwortung für die Umwelt*

### QUALITY MANAGEMENT AND CUSTOMER FEEDBACK

We are continuously developing our sustainability strategy in order to meet both current and future requirements. OSD regularly scrutinizes processes, researches alternatives and is in constant communication with suppliers, customers and employees.

Our team is always open to feedback in order to continuously improve our services.
